

Priority Axis 1 Indicators:

Indicator title	Indicator type (output, result, impact)	Evaluation of attainability of target value	Evaluation of relevance of target value
Schools successful in repeated quality assessment	Result	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Share of high-school graduates placed on the labour market	Result	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Number of newly created educational programmes	Output	The target value was achieved as of June 30, 2011.	The target value is relevant
Number of teaching staff members who pursued further education	Output	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant
Number of trainings for teaching staff	Output	The target value was achieved as of June 30, 2011.	The target value is relevant
Share of universities that have increased their effectiveness and management quality through OPE	Result	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Share of partnerships and research and innovation networks running after termination of support from OPE	Result	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Share of university graduates placed on the labour market	Result	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Share of research and development staff participating in further education	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Number of projects to support human resources in centres of excellence at universities and at the Slovak Academy of Sciences (SAS)	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Share of research and development staff involved in international research projects	Output	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant
Number of partnerships and research and innovation networks funded by OPE	Output	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant
PISA Index (number)	Impact	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Graduates of tertiary university studies (number / 1000 people)	Impact	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is not relevant

Priority Axis 2 Indicators:

Indicator title	Indicator type (output, result, impact)	Evaluation of attainability of target value	Evaluation of relevance of target value
Share of networks created as part of Learning Regions that are still in existence after the termination of OPE support	Result	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Number of trainers who pursued further education	Output	Attainability of the target value cannot be evaluated	Relevance cannot be evaluated
Number of supported programmes in further education	Output	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Number of new networks created during trainings for regions	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	Relevance cannot be evaluated
Share of medical staff who remained in health system after completing further education programmes	Result	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Share of medical staff who pursued further education for medical personnel	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Share of training programmes for further education of medical personnel	Output	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Share of population (in %) participating in life-long learning, aged 25-64	Result	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant

Priority Axis 3 Indicators:

Indicator title	Indicator type (output, result, impact)	Evaluation of attainability of target value	Evaluation of relevance of target value
Number of pupils with special needs participating in educational programmes	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Number of formal education programmes for persons with special needs	Output	The target value was achieved as of June 30, 2011.	The target value is relevant
Number of persons involved in social inclusion programmes for persons with special needs who were trained in further education programmes	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Number of further education programmes for persons involved in social inclusion programmes for persons with special needs	Output	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Share of placed graduates from formal education programmes for persons with special needs	Result	Attainability of the target value cannot be evaluated	The target value is relevant
Share of placed graduates from further education programmes for persons with special needs	Result	Attainability of the target value cannot be evaluated	The target value is relevant
Failure rate of pupils from socially disadvantaged backgrounds in elementary schools	Result	Attainability of the target value cannot be evaluated	The target value is relevant

Priority Axis 4 Indicators:

Indicator title	Indicator type (output, result, impact)	Evaluation of attainability of target value	Evaluation of relevance of target value
Number of newly created educational programmes	Output	The target value was achieved as of June 30, 2011.	The target value is relevant
Schools successful in repeated quality assessment	Result	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Number of teaching staff members who pursued further education	Output	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant
Number of trainings for teaching staff	Output	The target value was achieved as of June 30, 2011.	The target value is relevant
University graduates	Impact	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is not relevant
Share of research and development staff participating in further education	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Number of projects to support human resources in centres of excellence at universities and at the Slovak Academy of Sciences (SAS)	Output	The target value of the indicator is achievable even when no further calls are announced or published.	The target value is relevant
Share of research and development staff involved in international research projects	Output	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant
Number of partnerships and research and innovation networks funded by OPE	Output	The target value of the indicator is not likely to be achieved if no further calls are announced or published.	The target value is relevant
Share of partnerships and research and innovation networks running after termination of support from OPE	Result	The target value was achieved as of June 30, 2011.	The target value is relevant
% of population participating in life-long learning, aged 25 – 64	Result	The target value of the indicator is not likely to be achieved even when further calls are announced or published.	The target value is relevant
